Website Projects

Documentation for three static HTML/CSS websites

1. Overview

This repository contains three independent, single-page websites. Each one is a single `.html` file with its CSS in an embedded `<style>` block. None of them uses JavaScript or a framework, so they open directly in any browser.

Project	File	Purpose	Primary colour
Sweet Bites	cakes_shop.html	Bakery site: menu, custom cakes, offers, gallery, contact	Rose pink #E96B83
TechStore	online_shopping.html	Electronics shop with categories, discounts and ratings	Indigo #5B45E0
Travel With Us	travel_agency.html	Travel agency: destinations, packages, itinerary, inquiry form	Teal #087E8B

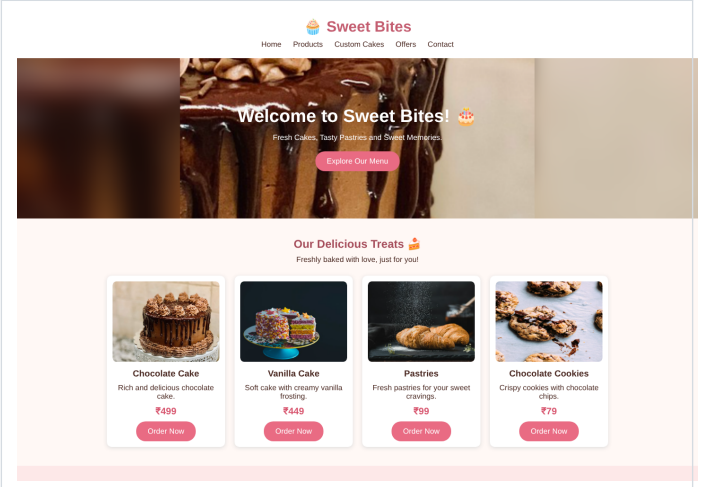

2. Shared technical approach

All three pages follow the same conventions:

- **Reset:** `* { margin:0; padding:0; box-sizing:border-box; }` at the top of each stylesheet.
- **Typography:** Arial, sans-serif for everything; headings are coloured with the brand colour.
- **Layout:** centred text sections; card grids built with Flexbox (`display:flex; flex-wrap:wrap; justify-content:center; gap`), so cards wrap onto new rows on narrow screens.
- **Navigation:** in-page anchor links (`href="#products"`) that scroll to a section `id`. No separate pages.
- **Buttons:** styled <a> tags with rounded corners and a darker hover colour.
- **Responsive:** the viewport meta tag is set and one `@media (max-width: 600px)` rule reduces the hero heading size.
- **Images:** hot-linked from Unsplash with `?w=` width parameters; every image has an `alt` text.
- **Icons:** emoji characters inside headings and text instead of an icon font.

3. Sweet Bites – cakes_shop.html

A friendly storefront for a bakery in Vijayawada, Andhra Pradesh. Visitors can browse four products, read about custom cakes, see current offers, look at a photo gallery and find the bakery's contact details.

Top of the page at 1440 px (see Screenshots.pdf for the full page).

3.1 Page structure

Section	Anchor	Content
Header	–	Logo "Sweet Bites" and nav: Home, Products, Custom Cakes, Offers, Contact
Hero	#home	"Welcome to Sweet Bites!", tagline, Explore Our Menu button; background photo with cover sizing
Products	#products	"Our Delicious Treats" with four cards (image, name, description, price, Order Now)
Custom Cakes	#custom	Photo of a decorated cake, two lines of copy, Order Your Cake button; blush background
Offers	#offers	Three offer lines with emoji and a View Products button; cream background
Gallery	–	"Our Sweet Gallery" with six 300 × 180 px images
Contact	#contact	Address, phone, email, opening hours, Contact Us (mailto) button
Footer	–	"Sweet Bites Bakery", slogan and copyright line on dark brown

3.2 Menu data

Product	Description	Price
Chocolate Cake	Rich and delicious chocolate cake.	₹499
Vanilla Cake	Soft cake with creamy vanilla frosting.	₹449
Pastries	Fresh pastries for your sweet cravings.	₹99
Chocolate Cookies	Crispy cookies with chocolate chips.	₹79

Offers: 20% OFF on selected cakes; buy 2 pastries and get 1 free; special birthday cakes at affordable prices.

3.3 Design tokens

Role	Hex	Swatch
Page background	#FFF8F5	
Body text and footer background	#4B2922	
Logo heading	#C45D70	
Section headings	#A64D5B	
Button	#E96B83	
Button hover	#C84D68	
Price text	#D95770	
Custom Cakes and Contact background	#FDE8E8	
Offers background	#FFF0C9	

3.4 Components and behaviour

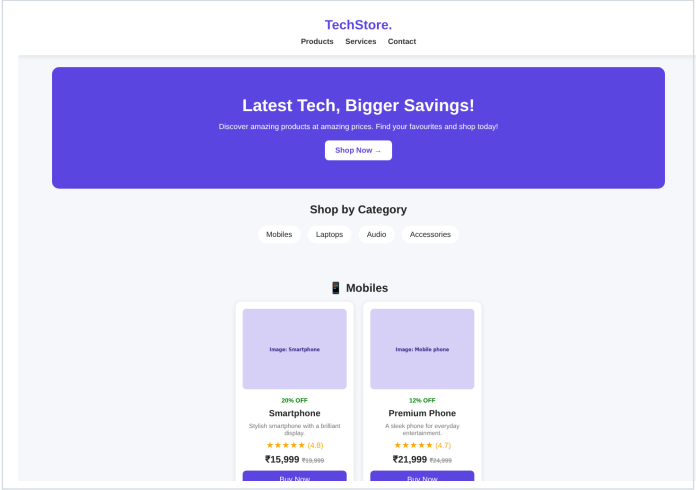

- **Product card:** 250 px wide, white, 12 px padding, 10 px radius, soft shadow; image 170 px high.
- **Buttons:** Explore Our Menu → #products; Order Now and Order Your Cake → #contact; View Products → #products; Contact Us opens `mailto:sweetbites@example.com`.
- **Hover:** navigation links turn pink; buttons darken.
- **Mobile:** cards and gallery images wrap into fewer columns; hero heading shrinks from 38 px to 26 px below 600 px.

3.5 Notes and suggestions

- The hero photo is also used for the first product card and the first gallery image; the Vanilla, custom-cake and celebration photos repeat in the gallery as well. Adding distinct photos would make the gallery feel richer.
- White text on the button pink (#E96B83) is roughly 3:1 contrast, below the 4.5:1 guideline for small text; a slightly darker pink would pass.
- Hero text sits directly on a photo; a semi-transparent overlay would keep it readable on any image.
- Address, phone and email are sample values and should be replaced before publishing.

4. TechStore – online_shopping.html

A storefront demo for electronics. Products are grouped under four categories, and each card shows a discount badge, rating, current price and the crossed-out old price. The footer states that it is a student project demonstration.

Top of the page at 1440 px. Photos shown as placeholders in this capture.

4.1 Page structure

Section	Anchor	Content
Header	–	"TechStore." logo (indigo) with links Products, Services, Contact; soft shadow
Hero	–	Indigo rounded banner (90% wide): "Latest Tech, Bigger Savings!", copy, Shop Now → button
Categories	–	Pill buttons for Mobiles, Laptops, Audio, Accessories that jump to each product group
Products	#products	Four groups (#mobiles, #laptops, #audio, #accessories) with two cards each
Benefits	#benefits	Free Delivery, Secure Shopping, Customer Support
Footer	#contact	Brand, tagline, email, copyright on dark indigo

4.2 Product catalogue

Category	Product	Price	Old price	Badge	Rating
Mobiles	Smartphone	₹15,999	₹19,999	20% OFF	4.8
Mobiles	Premium Phone	₹21,999	₹24,999	12% OFF	4.7
Laptops	Power Laptop	₹42,499	₹49,999	15% OFF	4.7
Laptops	Student Laptop	₹32,799	₹39,999	18% OFF	4.5
Audio	Wireless Headphones	₹1,399	₹1,999	30% OFF	4.5
Audio	Wireless Earbuds	₹1,599	₹1,999	20% OFF	4.4
Accessories	Smart Watch	₹2,249	₹2,999	25% OFF	4.6
Accessories	Wireless Mouse	₹899	₹999	10% OFF	4.3

The badges match the prices: each discount equals the gap between the old and current price, rounded to a whole percent.

4.3 Design tokens

Role	Hex	Swatch
Page background	#F5F7FB	
Body text	#222222	
Primary (logo, hero, buy button)	#5B45E0	
Buy button hover	#4030B5	
Discount badge text	#008000	
Rating stars	#FFA500	
Description text	#777777	
Old price text	#999999	
Footer background	#211C3C	

4.4 Components and behaviour

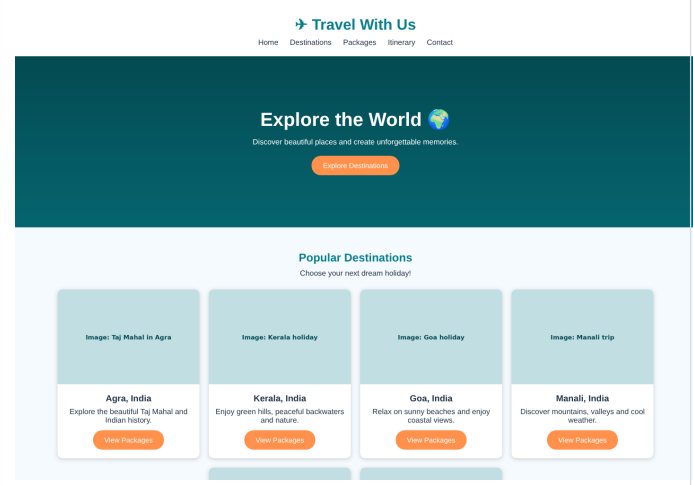

- **Product card:** 250 px wide, white, 15 px padding, 12 px radius; shadow deepens on hover.
- **Buy Now:** full-width block button linking to #contact (no cart or checkout).
- **Category buttons:** white pills that turn indigo with white text on hover.
- **Price display:** current price in bold with the old price struck through next to it.
- **Mobile:** cards stack in a single column; hero heading shrinks from 36 px to 26 px below 600 px.

4.5 Notes and suggestions

- Light grey text (#777 and #999) at 13 px is hard to read; darkening it would help accessibility.
- Contact details exist only in the footer; a contact form or mailto link could be added.
- A cart, search box or product detail pages would be the natural next features (these need JavaScript or a back end).

5. Travel With Us – travel_agency.html

A travel agency site based in Vijayawada. It presents six destinations, three priced holiday packages, a sample three-day itinerary and an inquiry form.

Top of the page at 1440 px. Photos shown as placeholders in this capture.

5.1 Page structure

Section	Anchor	Content
Header	–	"✈ Travel With Us" and nav: Home, Destinations, Packages, Itinerary, Contact
Hero	#home	"Explore the World", tagline, Explore Destinations button on a landscape photo
Destinations	#destinations	Six cards: Agra, Kerala, Goa, Manali, Jaipur, Maldives, each with View Packages
Packages	#packages	Three package cards with duration, price and Enquire Now; note that prices are samples
Itinerary	#itinerary	Three-day Kerala plan in cards with a teal left border
Inquiry form	#contact	"Plan Your Trip" form, submitted by email
Footer	–	Location, phone, email and copyright on dark teal

5.2 Holiday packages

Package	Duration	Price
Kerala Tour	3 Days / 2 Nights	₹5,999
Goa Beach Trip	4 Days / 3 Nights	₹7,499
Manali Adventure	5 Days / 4 Nights	₹9,999

5.3 Sample itinerary (Kerala)

Day	Plan
Day 1 – Arrival	Arrive in Kerala, check into your hotel and explore nearby places.
Day 2 – Sightseeing	Visit scenic viewpoints, local markets and beautiful backwaters.
Day 3 – Departure	Enjoy breakfast, shop for souvenirs and return home.

5.4 Inquiry form

Field	Type	Rules
Your Full Name	text	Required
Your Email Address	email	Required; browser validates the format
Choose a Destination	select	Required; Kerala, Goa, Manali, Jaipur, Agra, Maldives
Number of Travellers	number	Required; minimum 1
Travel date	date	Required
Tell us about your travel plans	textarea	Optional

The form uses `action="mailto:travelwithus@example.com" method="post" enctype="text/plain"`, so submitting opens the visitor's email app with the answers filled in. It does not send data to a server.

5.5 Design tokens

Role	Hex	Swatch
Page background	#F5FAFF	
Body text	#243447	
Headings and logo	#087E8B	
Button	#FF914D	
Button hover and price text	#E8752F	
Packages and Inquiry background	#E8F7F8	
Footer background	#12343B	

5.6 Notes and suggestions

- White text on the orange button (#FF914D) is roughly 2.2:1 contrast; a darker orange or dark text would be easier to read.
- The Kerala, Goa and Manali photos are reused in the package cards. Package photos that differ from the destination photos would add variety.
- Because the form depends on an email client, a hosted form service would be more reliable for real visitors.
- The itinerary is for Kerala only; other destinations could get their own plans.

6. Running and publishing

Open locally. Double-click any of the three HTML files. An internet connection is needed to show the Unsplash photos.

Publish on GitHub Pages.

- Push the repository to GitHub.
- Open Settings → Pages, choose the `main` branch and the root folder, and save.
- Visit `https://<username>.github.io/<repo>/cakes_shop.html` (and the other two file names).

Tip: rename one file to `index.html` if you want it to open at the root URL.

7. Quality checklist

Area	Status	Comment
Valid HTML5 structure	Good	DOCTYPE, charset and viewport meta tags present
Image alt text	Good	All images have alt text
Language attribute	Missing	Add `<html lang="en">` to all three files
Colour contrast	Needs work	Pink and orange buttons, and light grey text, fall below 4.5:1
Keyboard focus styles	Default	Browser defaults are used; custom focus styles could be added
Responsive layout	Basic	Flex wrapping works; only one media query is defined
Offline use	Not available	Images are hot-linked; store them locally for offline use
Real contact data	Placeholder	All emails, phones and prices are sample values

8. About the screenshots

Screenshots in this repository were captured with a headless browser at 1440 px (desktop) and 390 px (mobile). In that capture environment the Unsplash photos could not be downloaded: the Sweet Bites photos were taken from the original design, while TechStore and Travel With Us show labelled placeholders. Layout, text, colours and spacing are rendered from the actual HTML and CSS.
